

BEARDOW ADAMS™

> Unique In Hot Melt Adhesives

Working better with wood.

New concept.

New performance standards.

A new standard has been set. Beardow Adams answers all the modern-day needs of high quality woodworking operations – our adhesives are clean and easy to handle, and many are completely odourless. What's more, they don't fume and run without stringing or smearing.

Value for money comes as standard. This is because our hot melt adhesives, deliver higher efficiency, greater mileage, better adhesion and proven cost savings.

High performing. Outperforming.

Specially conceived for edgebanding, softforming and profile wrapping, our technologically advanced woodworking adhesives excel on the world stage.

Beardow Adams uses unique raw materials and production processes to produce woodworking adhesives that surpass the performance of standard adhesives. Ahead of their time, they answer every need:

- Clean and easy to handle
- Work with the majority of woodworking machines
- Adhere strongly to a wide range of materials
- Secure bonding of PVC, HPL, solid wood, melamine, wood veneer and many other materials to MDF and particle board
- High adhesion and ability to withstand low temperatures
- Suitable for both edgebanding and softforming
- High heat resistance (> 100°C)
- High bond strengths ensuring substrate failure
- Product available in a variety of colours, giving invisible glue lines
- Fast melt down for high-speed operations

Unfilled adhesives for a totally fulfilled wish list.

Would you like to reduce adhesive volumes by more than 50%. This figure can be realistically achieved with our BAMFutura® adhesives for wood, as they are unfilled with 100% active ingredients not 50% filler.

Solid success. Better bonding.

We have risen to the challenge to meet the special requirements of industrial woodworking which include:

- Edgebanding
- V-grooving
- Softforming
- Precoating
- Profile wrapping
- Veneer splicing

Beardow Adams hot melts for woodworking. The all-round answer for any application:

We can work wonders with wood. Our profile wrapping adhesives have exceptional heat resistance and allow door and door frame manufacturers to produce, lacquer and cure profiles in a single pass operation.

Our woodworking adhesives are clean and user-friendly, perfect for pre-coating, softforming, foambonding, top laminating and v-grooving.

Our high performance edgebanding hot melt adhesives can give exceptionally high chip failure, as shown here, and a temperature resistance of three days at temperatures above 100°C without delaminating.
